Dear Hiring Manager,

This letter is to express my interest in joining SMARTTEK as a DevOps Intern. I am currently a fourth-year engineering student at the National School of Electronics and Telecommunications of Sfax (ENET'COM). Throughout my studies and projects, I have developed a strong interest in software engineering, automation, and modern technologies, and I am highly motivated to grow in the DevOps field.

I believe I would be a great fit for your company within this role because I am curious, motivated, and eager to learn new technologies. My academic and personal projects taught me problem solving, teamwork, and software development skills. I gained valuable experience working with technologies such as Node.js, React.js, Python, MongoDB and Git, while also improving my ability to adapt quickly and work efficiently.

My time working on projects such as an AI-based almond sorting system and an e-commerce platform also inspired me to develop a passion for automation and system optimization. Combined with my technical skills and engineering background, this makes me an ideal candidate for a DevOps internship at SMARTTEK.

Given the opportunity, I can bring motivation, technical knowledge, and a strong willingness to learn while contributing positively to your team and projects.

Thank you for your time, and I look forward to speaking with you soon.

Best,
Aymen Zitouni
